

The Easter Egg Farm

Activity Backpack from

Collin County Farm Museum

Allow your student's imagination free reign and explore a different type of farm... The Easter Egg Farm. There are many different types of farms in the world today and some can be ingeniously unique.

Program Description:

- 📖 Book: "The Easter Egg Farm" by Mary Jane Auch, Kindergarten to 3rd Grade
 - Summary: Mrs. Pennywort's hen, Pauline, claims she's "just different" because she can't lay eggs when she's pressured. When she does produce one, it resembles whatever was in sight at the moment-- chicken wire, the sky, a ladybug, a butterfly, flowers, and later on, ballerinas and the Mona Lisa. Mrs. Pennywort realizes Pauline's talent could be quite lucrative, but before the designer eggs can be sold they start to hatch into chicks as multihued as the shells from which they come. The chicks grow up to lay vibrant eggs that would make any mother proud.
 - The book is large and zany with cartoon-style paintings in bright colors which are a perfect match for the comical story line. The book has a kookiness that children will love and may also be used to inspire art projects.
- 📖 Worksheet Activities for Reading/Comprehension Skills
- 📖 Vocabulary Exercise
- 📖 Art Activities: Make an Easter Egg, Leonardo Da Vinci & Mona Lisa, Your Imaginary Farm
- 📖 Physical Activities: Ballet & Chicken Dance
- 📖 Social Studies Activity: Easter in Other Countries
- 📖 Internet Activity: Easter Eggs
- 📖 History Activity: Real Chicken Farms
